

Brightleaf Retail Ltd

Junior Web Developer Job Pack

Brightleaf Retail Ltd is a growing technology distributor based in London, specialising in consumer electronics, smart devices, and workplace solutions. We partner with global manufacturers to deliver innovative products and support businesses across the UK and Europe.

Role Overview

We are seeking a motivated Junior Web Developer to join our in-house development team. The role involves supporting our digital platforms, maintaining the Brightleaf website, and assisting with internal projects to improve operational efficiency.

Key Responsibilities

- Assist with WordPress site maintenance and plugin updates
- Help develop internal dashboards and reporting tools
- Work on API integrations with supplier systems
- Support ongoing improvements to the Brightleaf website

Requirements

- Basic knowledge of WordPress and MySQL
- Exposure to OpenVPN configurations is a plus
- Familiarity with JavaScript, PHP, and RESTful APIs preferred
- Eagerness to learn and contribute to a growing team

How to Apply

Please send your CV and a short cover letter to **careers@brightleafretail.com**
Use the subject line: **Junior Web Developer Application**
